

# HOW DO YOU POWER UP YOUR BUSINESS IN AN EVOLVING ENERGY MARKET?

Discover the insights you need to thrive in unpredictable  
energy markets

From regulatory changes to new energy sources, the power, gas, coal and carbon markets are facing unprecedented changes. Systematic fluctuations in supply and demand complicate knowing when it's the right time – and right price – to make trading and purchasing decisions. Staying ahead of the market is critical. But you can only do that with the right information, available at the right time.

**Are you looking for  
a clear competitive  
advantage in today's  
energy markets?**

## Market challenges

---

There's no question that we all depend on energy. However, energy supply is increasingly unpredictable due to intermittent renewable production and the complexity of modeling demand. This makes it difficult for traders to assess future market price developments.

---

High price volatility has become the new norm. Here's why:

### Geopolitical instability

Tensions in many of the world's most important energy-producing regions, including the Middle East and Caucasus, complicate the market. For example, Qatar, which is in a dispute with four Arab states, is increasing its production of LNG. The additional gas volumes available for export will cement its position as the world's largest LNG supplier and help it weather the boycott by its neighbors.

### Policy and regulatory change

Country-level energy policies, such as those in China, India and other countries, and tighter regulations on emission allowances are continually shifting trends in energy use and affecting supply and demand levels.

### Continued globalization

Firms need to be able to access comprehensive, global information to deal with new developments. For example, the addition of pricing content from new over-the-counter (OTC) and exchange venues, and the continued proliferation of fundamental data sources in one place for traders and analysts to build forecasts and better assess price direction.

### Electricity trends

A growing preference for electric vehicles points to a new consumer landscape that relies on electricity to sustain global infrastructure.

---

**Facing these challenges, do you have access to credible market news, pricing data, analysis and forecasts?  
Are you able to identify new markets of demand and sources of supply before your competitors?**

In a changing energy market, having the knowledge, intelligence, insight and analysis to act swiftly is one thing. Being able to trust this information is another.

That's why traders and analysts around the globe trust Refinitiv. We provide accurate, reliable, real-time data – along with the capabilities to easily manage and interpret it – so you can trade intelligently. That's the powerful competitive edge you require to thrive.

## Trading essentials

---

Everything you need on a single, intuitive desktop.

## News via Reuters

### Be the first to know what's happening

With almost 200 specialist commodities journalists in 20 countries and a vast network of global reporters, Reuters is one of the longest-standing and most trusted news providers in the energy market. Reuters journalists are on the ground to report the news, interpret its impact and produce exclusive market reports. For deep insight and market context, Refinitiv Commodities Research analysis is always supported by price data, analytics and graphics.

#### Here's your inside track on what's moving the market:

- European and North American power, gas, carbon and coal forums, with a live messaging community to help you keep track of events
- Thought-leading, independent commentary from our knowledgeable columnists, specialist journalists and key industry influencers
- Coverage of political, corporate and macroeconomic news as well as policy decisions that impact commodities pricing
- Highly relevant articles that break down the complexity of significant trends

## Fundamentals

### Understand what has happened and what's happening now

Our intuitive approach and consolidated global energy supply and demand data reduce the cost and time it takes to source and manage fundamental data.

We deliver the most comprehensive range of global cash, OTC, export prices and FX rates, as well as real-time data from the world's major commodity exchanges. You can also view up to 20 years of data. Our pre-built tables, tools, charts and models are designed to show highly relevant and accurate information, so you can interpret complex price data with speed and ease.

#### What we deliver:

- Raw data in normalized format across power, natural gas, LNG, coal and carbon markets
- A consolidated set of current and historical energy supply and demand data
- Deep, intelligent views of both the physical and futures markets
- A clear, intuitive interface to explore by commodity or date
- Meaningful charts, tables and graphics
- Personalized, downloadable models and analysis

#### What you can do:

- Spot opportunities and act quickly
- Access key providers, such as Platts, Argus Media and IIR
- Retrieve contributed data from a range of sources
- Harness content from our in-house market experts, available on a single desktop

## Research and forecasts

### Know what's on the horizon

The task of predicting future price movements and changes in supply and demand becomes more complex every day. Our forward-thinking team of energy research analysts will be the first to provide you with consistently accurate analysis and proven forecasting.

When you're in front of the action, you can act with confidence. To help you make profitable trading and purchasing decisions early and more thoroughly, we provide:

- Sophisticated proprietary forecast modeling and techniques
- Fundamental data to help you predict future price movements, such as weather and production numbers and information on developments in regulatory policy
- An impartial interpretation of where the market is going
- Commentaries and publications that analyze upcoming policy decisions and announcements
- Insights and views on how the markets will move depending on different outcomes
- Access to the observations and opinions of analysts, hydrologists and meteorologists

## Technology

### See it first, know it best

Whether it's trade flows, supply and demand data, vessel movements or severe weather, our interactive map is the fastest, most direct way to see the key factors that could impact your trade. Our range of models, calculators and three-dimensional charting tools enables you to perform complex analysis quickly and easily. You'll uncover deep insights so you can confidently execute trades, manage compliance, proactively mitigate risk and increase your profits.

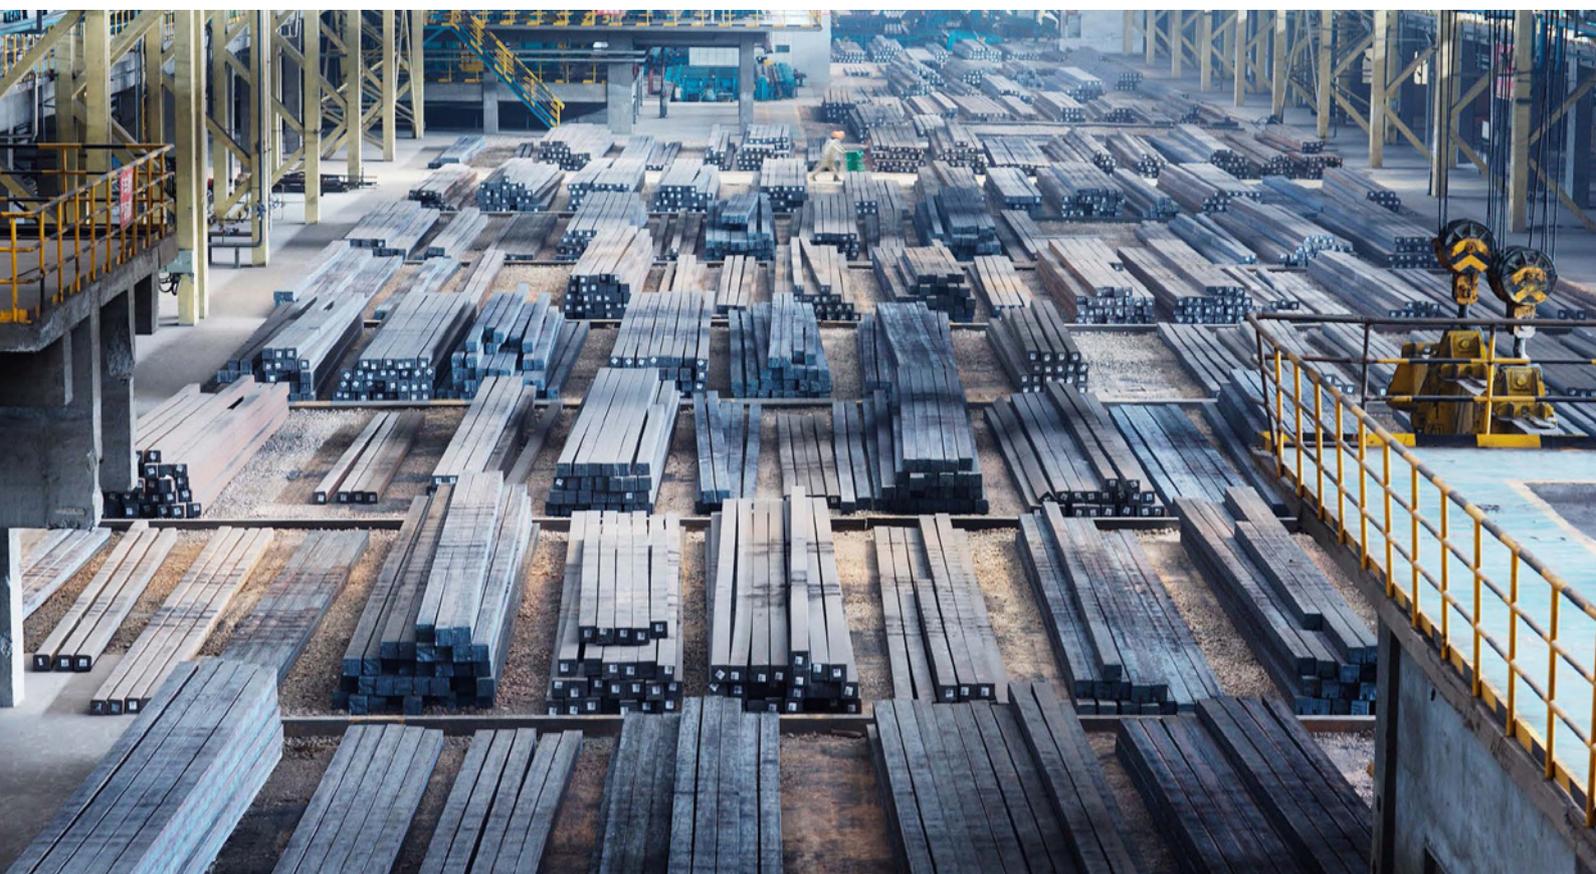

#### Features and benefits:

- Intuitive natural language searches and clear displays
- Comprehensive, accurate, timely and relevant news and data
- Dynamic charting with analytical tools to visualize the market
- Tools and applications that filter and display information relevant to your workflow
- Support for pre-trade and post-trade workflows, linking people and markets more efficiently
- Easy navigation and editable features
- Infrastructure and services designed to meet the most complex requirements
- Connections to the broader financial community

## Why Refinitiv?

Know where the market is, where it's likely to go, and where you fit in.

Refinitiv has the answers to all your critical questions. We're at the center of the world's energy community, providing you with accurate intelligence and the most comprehensive actionable insights into the global power, gas, carbon and coal markets. Our unique combination of analysts in the field and technology provides you with the capabilities you need to gain that competitive edge.

STREAMLINED  
DATA SOURCES

CUSTOMIZABLE  
FEATURES

USER-FRIENDLY  
INTERFACE

EXCLUSIVE MARKET  
INSIGHTS

We understand that your business is unique, so we tailor our solutions to meet your specific needs. This way, you are better positioned to make the most informed investments and trading decisions.

## Our products

---

Get the tools and information you need to discover and seize new opportunities.

### Refinitiv® Point Connect

**Point Connect** has the most comprehensive energy data, on demand, saving you the cost of acquiring data from multiple suppliers. You can see current supply, transmission, demand, stock levels and actual emissions caps. Refinitiv Commodities Research and third-party information providers also deliver calculations and model runs.

### Refinitiv® Real-Time Data Platform

**Real-Time Data Platform** provides access to real-time, reference, end-of-day, time series and alternative data, as well as powerful analytics solutions. Tap into an unrivaled depth of coverage – including equities, FICC and OTC derivatives content – and integrate this content with your proprietary data and information from third-party sources. With Real-Time Data Platform, your team can discover, integrate, enrich and consume the content they need, wherever they need it – whether that's in a data center, managed service or the cloud.

### Refinitiv® Eikon

**Eikon** is a flexible, open platform that's purpose-built for trade innovation. It lets you connect with the world's largest directory of verified financial professionals. Master the market and make smarter decisions with our incredible financial analysis data. Get the information you need, when and how you need it.

### Refinitiv® Messenger

**Messenger** is a “virtual trading floor” – a free, open, secure and compliant collaboration tool that allows you to connect to key contacts and gain exclusive access to our global community. You can follow the hot topics of the day and share charts and data. And you can communicate and collaborate with the world's largest validated directory of financial services professionals – anywhere, anytime and on any device.

### Refinitiv® DataScope Select

**DataScope Select** gives you the non-real-time pricing and reference data your users need, with the flexibility to only pay for the content consumed. It also provides on-demand delivery of our universe of over 80 million active and retired securities.

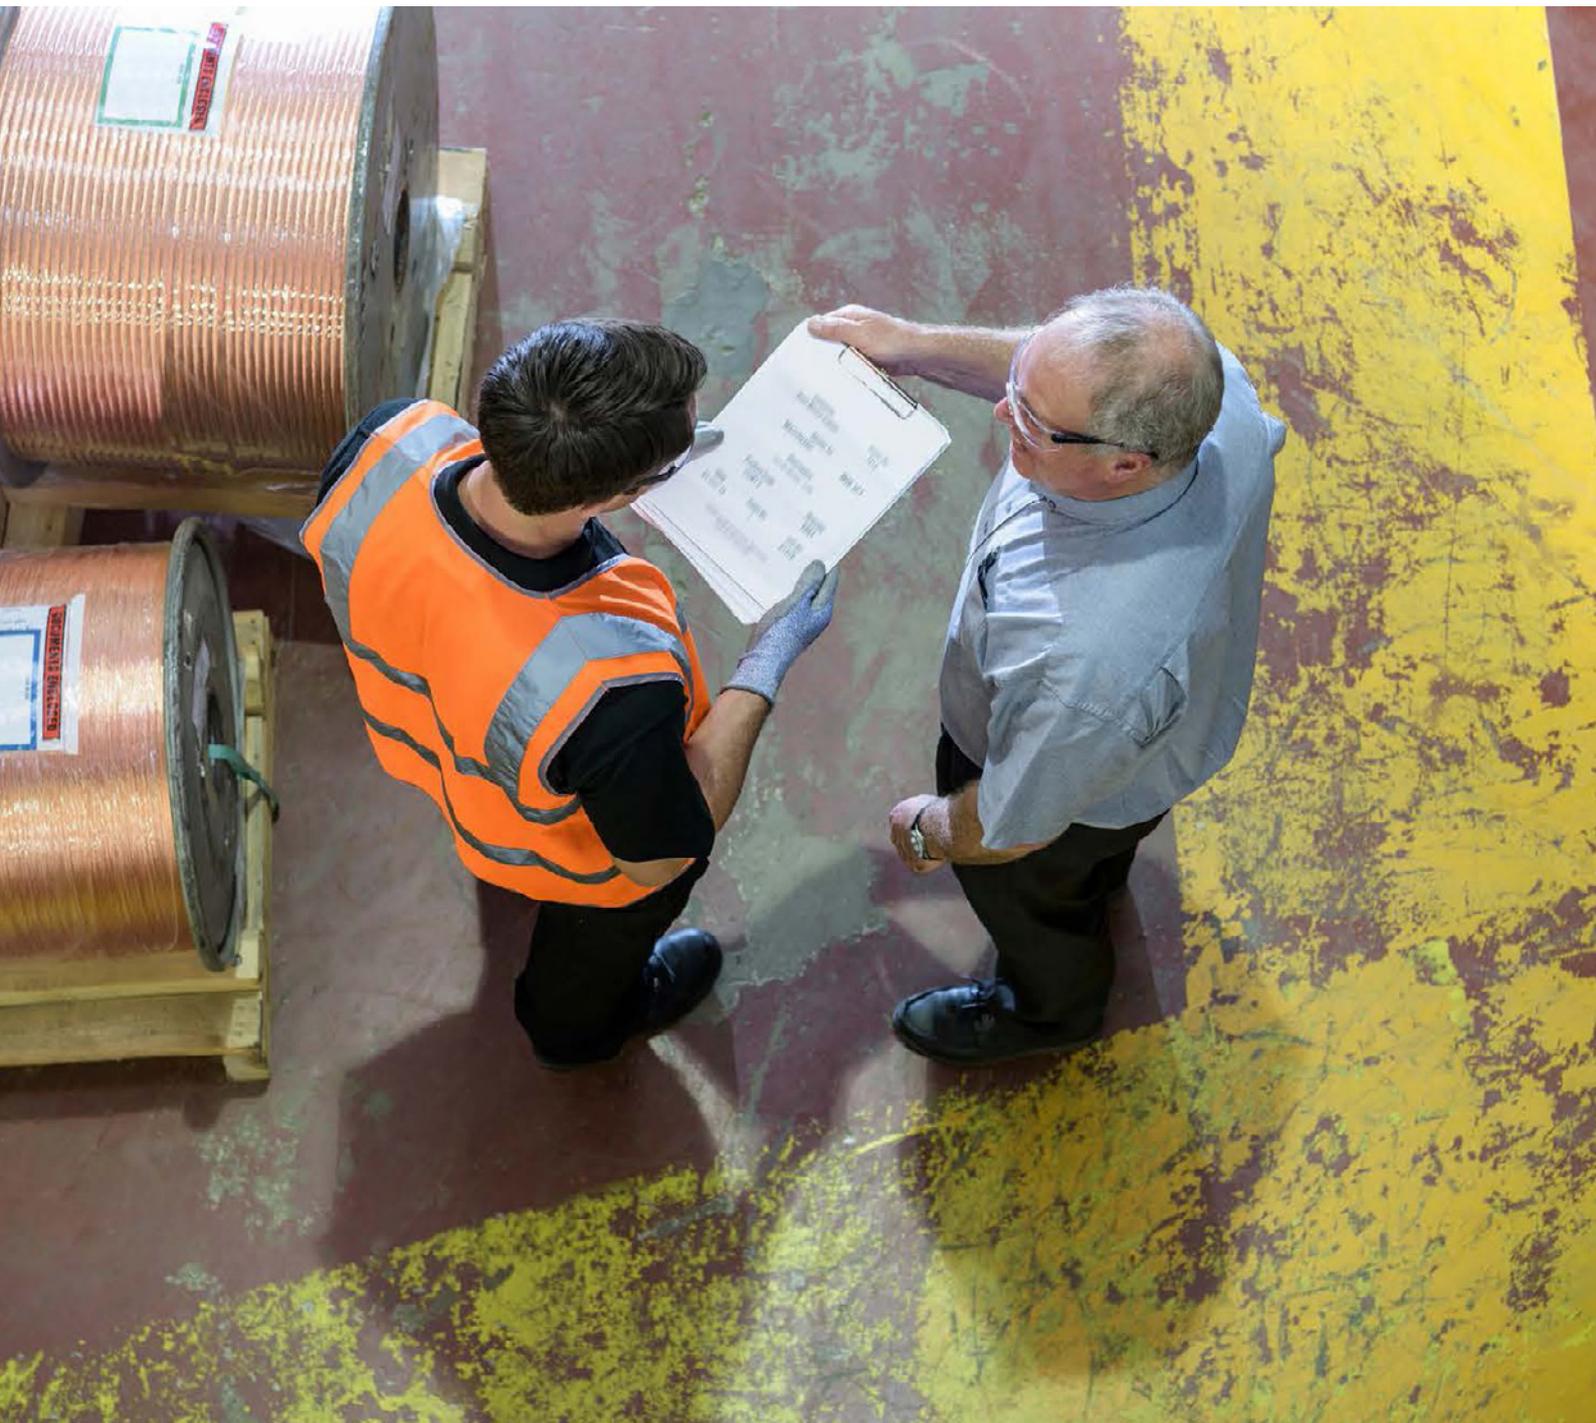

### Refinitiv® REDI® EMS

**REDI EMS** is our award-winning execution management system. It simplifies your workflows to allow you to trade smarter, faster and safer as you move through the trade life cycle – all while keeping costs in check. It works in combination with our full suite of trading products, offering a single point of entry to execute orders and tap into advanced post-trade capabilities, including trading and risk analytics.

## Partnerships

---

Uncover more opportunities, innovation and growth through our partner network.

---

**Our content roadmap is constantly updated to help you make better informed trading and planning decisions. Whether you need independent price assessments, fundamentals or forward prices, our third-party specialist data has you covered.**

**Argus Media** – A leading provider of price assessments, business intelligence and market data for the metal industry. Argus Media offers full service provision across geographies and continuously creates new price assessments to reflect actual trade dynamics in each region, creating enhanced opportunities to identify favorable trade conditions.

**Genscape** – The source of truth and insights for the global energy market. It operates the world's largest private network of in-field monitors and distributes industry-leading, real-time and historical data, delivering unsurpassed market intelligence across the commodity and energy spectrum.

**ICIS** – Quality market intelligence and pricing information for global petrochemical and energy markets. It offers unbiased, independent price assessments and indices widely quoted as benchmarks in contracts.

**IIR Energy** – A leading supplier of energy asset information on power plants, oil refineries and natural gas infrastructure. It is available on Eikon as an add-on service, allowing you to track planned and unplanned interruptions affecting the trading, logistics and marketing communities. As supply changes occur, the models update automatically so you can assess the capacity and pricing impacts of those changes at speed.

**Lilac Energy Software** – A software systems supplier that enables Europe's energy clients to grasp complex problems quickly, put requirements into context, and design and deliver intuitive, well-engineered solutions that combine flexibility and efficiency – all to match your individual business priorities.

**S&P Global Platts** – A leading global provider of energy information. This premier source of benchmark price assessments provides information and insights that can help you spot opportunities and make sound trading and business decisions. This data is delivered fast, to keep you one step ahead of the competition.

What's the bottom line?

**It's time to energize  
your trading business.**

**Let us help you  
optimize your deep  
analysis and spot  
growth opportunities  
in the power, gas, coal  
and carbon markets.**
