

ARGUS MEDIA ENERGY DATA ON REFINITIV SERVICES

Argus Media price assessments are widely used in the energy industry in physical supply contracts and for the settlement and clearing of financial derivatives.

Introduction

Argus Media prices are also used as a reference in swaps markets, mark-to-market, project finance, taxation, royalties and risk management. Argus Media offers full service provision across geographies, and new assessments are created continuously to reflect changing dynamics and flows.

Take advantage of Argus Media data on Refinitiv to see where the markets may be heading and to plan your next moves.

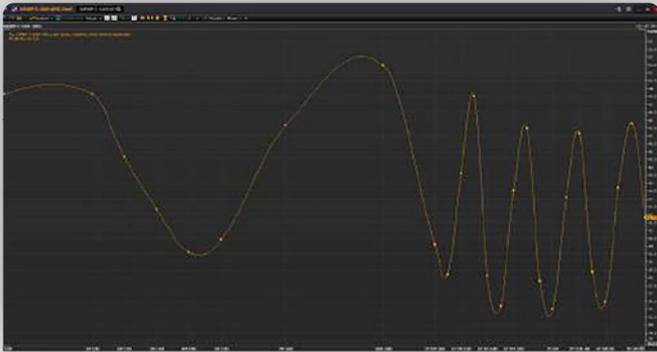

Argus Media provides a number of fee-liable data sets and features through Refinitiv® Eikon, Refinitiv® DataScope Select and the Refinitiv® Real-Time Data Platform. Content is also available via the dedicated Argus Media app.

Some of the latest additions to the app and general content are described below.

Value-added functionalities

Charting and analysis

Eikon forward curves and seasonality charts allow users to analyze Argus Media data.

Price revisions

Corrections are a natural part of the price-reporting process. Clients need to know when corrections have taken place and what the new values are. The Corrections app displays all Argus Media corrections, which can be filtered down by assessment and date.
