**REFINITIV® EIKON APP STUDIO**

Refinitiv® Eikon now allows customers and partners to embed their own applications, content and workflows, creating an integrated end-to-end solution. Eikon users benefit by getting access to specialized apps built by diverse providers, which are tightly integrated with native Eikon capabilities. App providers gain the ability to easily reach the Eikon user community, along with the tools to manage access to their apps.

Get best-in-class applications not just from Refinitiv, but from third-party developers across the world. These can include:

- Advanced charting
- Pricing calculators
- Unique data sets
- Trade ideas
- Cutting-edge research

**For the end user**

In addition to the wealth of native applications and tools in Eikon, Refinitiv provides access to:

- A global library of specialist third-party Eikon applications
- Desktop environments specifically tailored to your requirements
- Seamless workflow through deep integration between native and third-party apps:

**For application providers**

Easily reach your users and customers where they already are: in Eikon. Reduce the total cost of ownership by leveraging Refinitiv infrastructure, administration, user entitlement and app management tools:

- Leverage a wide range of Refinitiv content and functionality via a suite of APIs
- Distribute applications in a highly secure and controlled environment
- Use the Eikon user entitlement and reporting tool to administer your application
- Leverage the knowledge, best practices and resources of the Refinitiv Developer Community
- As a partner, choose between two commercial models:
  - Distributor, where Refinitiv takes care of billing and contracting
  - Direct, where the partner does the billing and contracting
